

## Questionnaire for CAPTOR Hosts I

Welcome as CAPTOR Host!

CAPTOR is a European research project, in which citizens, environmental organisations and researchers fight together against ozone pollution. For that matter we apply a completely novel approach of collaboration: scientists take responsibility for a new way of measuring and analysing the ozone pollution data; citizens support the local measurement and monitoring of the ozone data and become together with the environmental organisations promoters of change in their local region.

To better understand, what are the reasons and expectations of involved participants in the project, we developed this questionnaire. We would kindly ask you to take **3 minutes** of your precious time to fill in this questionnaire.

We guarantee you, that the participation in this survey is completely anonymous and on a voluntary basis. There are no personal data collected, analysed or handed over to third parties.

When you fill in the questionnaire, we would kindly ask you to fill in all questions honestly – **as there are no „right“ or „wrong“ questions**. All additional remarks and comments from you are very helpful for us.

### 1. How did you get to know CAPTOR (e.g. social media, friends, media, an organisation?)
